The QR-30DNB features a unique needle-bar drive that allows the needle to retract into the casting of the machine when the treadle pedal is heeled back. This simple action also raises the presser foot a full 3", allowing operators to quickly load panels and move to the damaged or incomplete area of the quilted panel being repaired.

- Only quilt-repair workstation with a disappearing needle bar and presser-foot assembly.
- Comes standard with a wide-bowl presser foot with EZ-view T sight windows.
- Unique design allows the operator to easily follow the complex contours of any damaged quilt pattern.
- Operators can move with the ease and accuracy of a computer-controlled quilting machine.
- Pressurized, automatic lubrication system and heavy-duty welded steel construction ensures your repair machine will not require repairing.

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
