

Spectrum[®]

High-Speed, Multi-Head Quilter

Chainstitch quilter from Gribetz International is a unique, multi-head quilting machine with distinct needle-control technology.

The Spectrum® quilter uses newly developed Gribetz engineering to turn on/off 15 independently sewing needles to create patterns unlike any conventional three-bar quilt machine. It consists of two rows of independently controlled sewing heads that can sew at speeds up to 1450 RPM. Spectrum is built on the highly successful V16™ framework for high-volume production with high-grade components for precise pattern definition.

- Independent sewing heads eliminate manual needle changes for pattern changes.
- 15 independent sewing heads.
- Sews a variety of Class I, II, and III patterns, all Tack & Jump (Class IV), and distinct needle patterns.
- Sews creative pattern designs with great productivity.
- Equistitch ensures equalized stitch length in all sewing directions.
- Compatible with Gribetz AutoSchedule® and BatchMode for greater efficiency/profits.
- Innovative thread trim design cuts top and bottom thread – eliminating tails.

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
